**Importance:** High

PRD and EFED management –

Attached is a brief informal response to NMFS' draft RPAs/RPMs for chlorpyrifos, malathion and diazinon for your **comments/concurrence by COB today**, if possible, so EFED can send the response to Rick (Rick already has EFED's comments on the overall draft biological opinion). We told NMFS this morning that we would try to send them our comments by early next week. They have a few weeks reprieve now to consider our comments (new date to deliver the BiOP to us is end of June).

I have also attached NMFS' chapter 26 RPAs/RPMs and OPP's 2013 response to NMFS on the draft BiOP for diflubenzuron, fenbutatin oxide, and propargite, which I referred to in drafting the

current informal response.

Please let me know if you have any questions. I am in tomorrow.

Tracy
